

# Sarah and Mike's Household, May 2024

Sarah Smith (41), Mike Gantt (45), Isabel Smith-Gantt (4), Teddy (the Dog, 3)

## TOP JOINT GOALS

1. Adjust for new cash flow impact with the birth of a **second child** in 7 months.
2. **Renovation fund** plans to expand current 2 bedroom to 3 bedrooms within 5 years.
3. Stay on track to hit your **freedom number** by 2040 based on the retirement plan.
4. Stay on track to finance **college education** for Isabel in 14 years (2038) and the newborn in 18 years (2042).

## ACTION PLAN FOCUS

- Reallocate **\$1,000** of monthly cash flow for the average additional expense for the newborn, based on location benchmarks.
- Leverage surplus **\$47,546** and move **\$87,500** emergency savings to 5% yield savings account, minimize renovation loan in 5 years.
- Maintain current 401(k) & IRA savings rate, consider asset allocation to a **Growth** mix.
- Fund 1/3 of private school college education or 100% in-state public, target **\$150,000** per child. Increase 529 savings to **\$1,000/month**.

## NET WORTH & FREEDOM \$

**\$736K** net worth, on track to hit **\$2.796M** by the 2040 target date with annual savings of **\$17,000**.

### Balance Sheet

Bank	\$50,000
Invested assets	\$550,000
Real estate assets	\$800,000
Life insurance cash value	\$0
Other assets	\$0
Credit cards	\$4,000
Mortgages	\$595,000
Home equities	\$0
Student loans	\$65,000
Other debts	\$0
<b>Net worth</b>	<b>\$736,000</b>

## CASH FLOW

**Annual Net Income:**  
\$170,000

Current savings of **23%** is healthy and above the **20%** target. Seek to reallocate discretionary spending to **30%** goal-based savings.

**Monthly Net Income:**  
\$14,167

**Essential Expense:**  
\$6,659

**Discretionary:**  
\$4,250

**Savings:**  
\$3,258

## AREAS OF OPPORTUNITY

**Emergency Fund.** Congrats! Your emergency fund is healthy at **\$87,500** and higher than your 6-month essential expense target of **\$39,954**. Save the **\$47,546** surplus for the renovation goal. Move funds to a 5% yield savings account to earn **\$4,375+** more per year.

**Insurance.** Health and auto insurance are **on track** for the household. Basic life and home insurance are in place, but a **deeper assessment of coverage** limits is recommended. Umbrella liability insurance should also be considered to protect your growing wealth from liability risk.

**Taxes.** Your effective federal tax rate is **10%**, which is highly tax efficient. You have opportunities to maximize tax savings further with increased retirement & HSA contributions, along with new federal home energy rebates.

**Trusts & Estates.** Though you have a basic will in place, you are **not fully covered** with the necessary protections, e.g., health proxy, power of attorney, a living trust. We recommend a full assessment and execution plan.

## GOAL 1 - ADJUST CASH FLOW FOR NEWBORN IN 7 MONTHS

**Benchmark the new child expense.** The average additional monthly household expenses per child in your area is \$1,000.

**Reallocate \$1,000 of current discretionary expenses.** Total discretionary expenses total **\$4,250**. There's opportunity to re-allocate from some of the larger current spend areas such as auto and transport (\$700), dining out (\$700), entertainment (\$400), health and fitness (\$200), shopping (\$500), and uncategorized (\$500).

### ACTION PLAN

- 1.** Terminate the **Equinox membership** and exercise outside, in your garage, or on your treadmill instead.
- 2.** Sell your **10-year old gas-powered Volvo** that requires a lot of maintenance expense. Take advantage of new \$7,500 EV federal tax rebates and get a new EV lease at \$0 or low down payment.
- 3.** There is a lot of opportunity to cut **dining out** expenses from \$700 (approx. 7 times) to \$300 a month (2 to 3 times) and you still can enjoy life. Plan meals at home and track this cut.

### RESULTS

- = Free up **\$200** a month by cutting the Equinox membership.
- = If you can get a 3-year EV lease at \$250 per month with no / low down payment and no maintenance costs, that frees up **\$400** per month from gas and maintenance expenses.
- = Free up **\$400** per month by cooking more at home and dining out less. With a newborn, you'll be home a lot anyway.

## GOAL 2 - FUND HOME RENOVATION IN 5 YEARS

**Benchmark the home renovation expense.** The average cost of a one-bedroom addition to a home in your area is **\$140,000**.

**Leverage surplus savings and tap home equity for the renovation loan.** Additional interest at 5% annual yield from the **\$87,500** emergency fund in 5 years equals **\$24,174**, plus the **\$47,546** surplus will net you **\$71,720** for the renovation. You will have sufficient home equity to get a home equity loan for the remaining **\$68,280** to fund the planned renovation.

### ACTION PLAN

1. Move the **\$87,500** emergency fund, including the surplus **\$47,546** savings, to a **5%** high yield savings account.
2. Keep your **credit score** at or above your current 820 score. Monitor it by obtaining a credit report from each of the three credit bureaus — Experian, Equifax, and TransUnion. By federal law under the Fair Credit Reporting Act (FCRA), these reports are free and can be acquired at [AnnualCreditReport.com](https://www.annualcreditreport.com).

### RESULTS

- = You will have **\$71,720** to offset the cost of the renovation loan in 5 years. This includes the **\$47,546** surplus and the interest of **\$24,174**, while retaining the 6-month emergency fund.
- = With an 820 credit score or higher, you will be able to get the lowest interest rates available for a home equity loan to fund your goal. Every 1% reduced interest rate means **\$10,781** in savings on a **\$68,280** loan.

## GOAL 3 - STAY ON TRACK TO FREEDOM / RETIREMENT BY 2040

**Your freedom number.** Based on scenario modeling using key assumptions - planned goals / lifestyle, income sources such as social security, home downsizing, geographic location, benchmark forecast monthly expenses, timeline for freedom / retirement - you are targeting **\$2.796M (with \$2.2M investable assets) by 2040.**

**Your monthly tax-deferred savings.** You will need to consistently contribute at least **\$17,000** per year to tax-deferred household savings accounts. You should also consider maxing out your annual 401(k), 403(b) (at \$23,000 per person), IRA contributions (\$7,000 per person), and HSA accounts (\$8,300 for families) to optimize tax deductions.

**Your asset allocation mix.** Your current allocation is a **Moderate** mix for likely annual return of **7.4%**. With the retirement timeline still far off, consider a **Growth** mix of **70% equities, 30% fixed income**, for a higher likely rate of annual return at **8.3%**.

Current allocation

35%	U.S. Equities	43%
14.5%	International Equities	17.9%
4.6%	Emerging Markets	6%
2.3%	Real Estate	3%
30.5%	U.S. Bonds	23.6%
4.8%	International Bonds	4.5%
8.3%	Cash	2%
0%	Other	0%

Target allocation

Growth

Equity / Fixed Income

Annual return: 8.3%  
Standard deviation: 12.7%

### ACTION PLAN

1. Maintain current **401(k), 403(b) and IRA** savings rates, If you can find savings from discretionary expenses or additional income, maximize contributions.

### RESULTS

- = You are on track to reach your **freedom money goal by 2040.** Additional savings will increase that likelihood and increase current income by reducing tax liability now.

## GOAL 4 - REACH KIDS EDUCATION FUND TARGETS BY 2038 & 2042

- 1. Benchmark the cost of education.** College cost estimates for 2038 are **\$155,492** for a four-year, in-state public college and **\$435,486** for a private college.
- 2. The one-third rule.** You should consider funding education with this rule - 1/3 of the cost from savings, 1/3 from current income during the kids' college years, and 1/3 from loans or other sources. A recommended approach is to target savings of at least **\$300,000** by the target date (that's \$150,000 for each child). To stay on track, that's close to **\$1,000 per month** (approx. \$500 per month, per child) starting from birth. Should private college be the best path, you can take the one-third rule approach to financing education. Should a four-year, in-state public college be the best path, you will have education fully covered.

### ACTION PLAN

- 1.** Reallocate **\$1,000 monthly discretionary spending**, e.g., from entertainment (\$400), shopping (\$500), or uncategorized expenses (\$500).
- 2.** Find additional sources of **\$1,000 monthly income** such as a raise or side hustle to allocate to the education fund.
- 3.** Set up automated **\$500** monthly payments to **Isabel's 529**. There is currently \$1,000 in the fund since her birth 4 years ago. Consider adding \$50 extra to make up for the past 4 years.
- 4.** Open a separate **529 for the newborn** and set up automated **\$400** monthly payments.

### RESULTS

- = Allows **existing cash flow** to move towards the household priority of funding the kids' education.
- = Leverages **additional cash flow** to put towards the household priority of funding the kids' education.
- = By automating this payment, you can stay on track to fund **Isabel's education by 2038**. At \$500 a month, a 6% return rate for 14 years yields \$135,000, at \$550 it yields \$147,000.
- = By automating this payment, you can stay on track to fund the **newborn's education by 2042**. At \$400 a month, a 6% return rate for 18 years yields \$155,715.
